I do hope our holidays
this year are a bit
better than last...

I suppose you're right there, Roger
Let's see, the nice woman at the
travel agents did give such a
good impression about Akturi-A023B

The arepas are meant
to be fantastic, too!

Well, it can't possibly
be worse than those
rude people on Centauri-106x

I can't wait to see the
integral canyon of ethermarelity

Yes dear! Even though the forecast is a whole week of sunshine!

Did you remember the brollies, Phyllis?

Righto! It's just you never can always count on it!

← AKTURI-A023B

There it is!

Roger I can't wait,
it will be splendid!

Oh my, it's beautiful!

NASA ATS III 10Nov67 153107Z 3N

Roger...

I don't think this looks
like the brochure...

Yes dear

Well, things are a bit
grey, aren't they

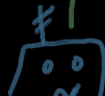

And those things!
They're moving at
quite an alarming
rate

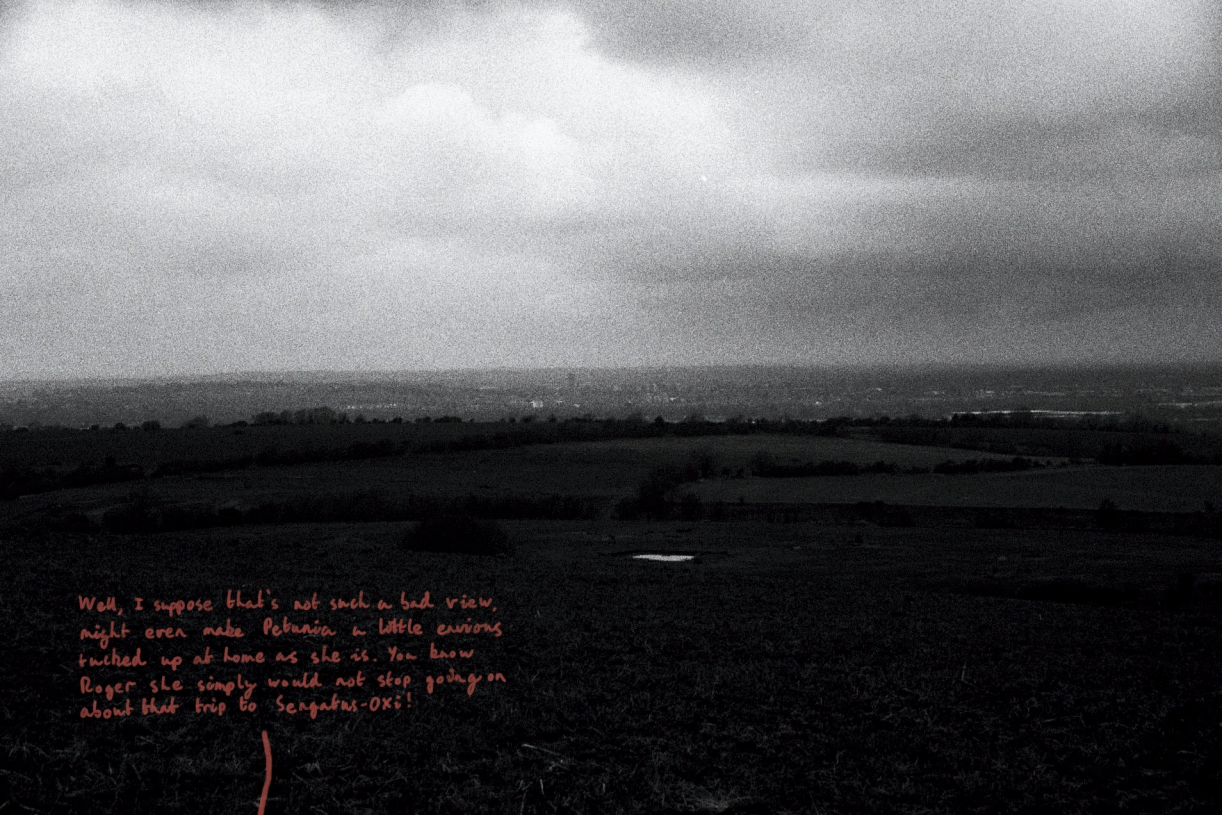

what ever could they be?

My gosh, yes!

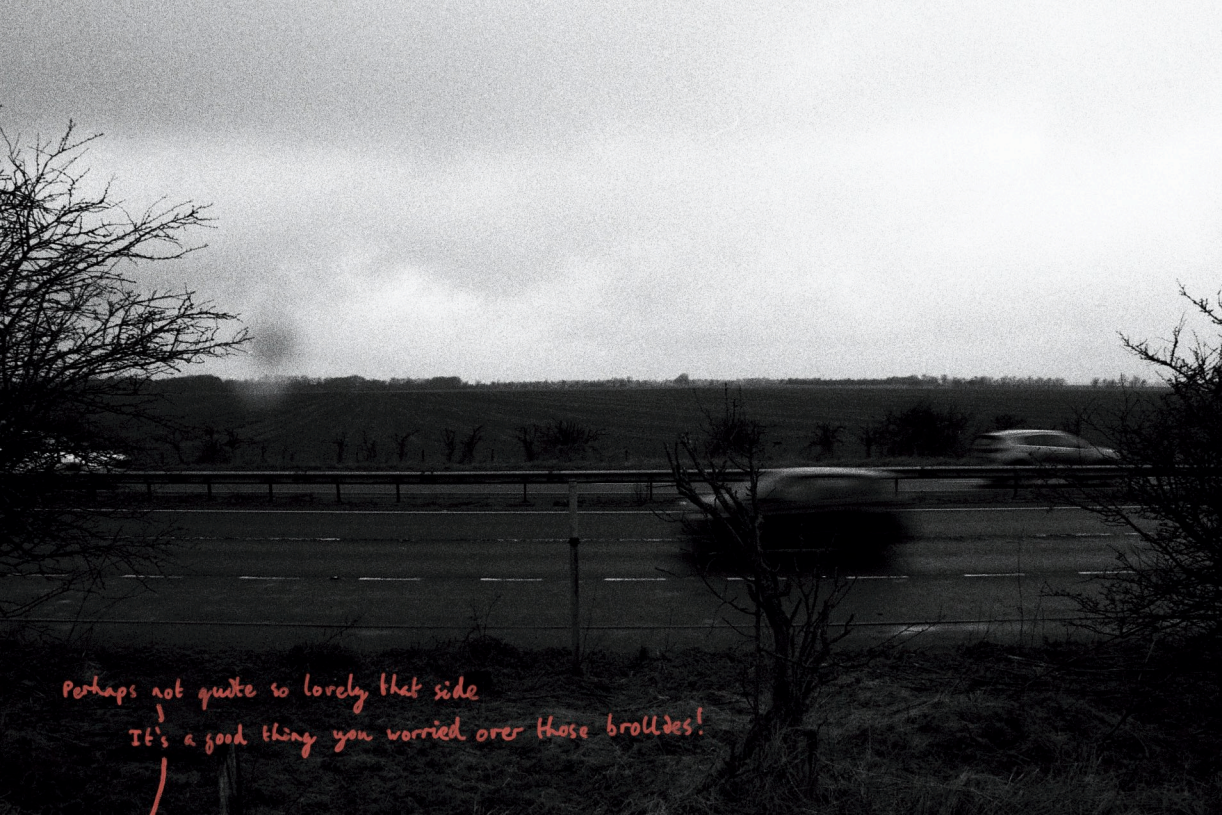

Yes, I think we
ought to

I'm afraid that I
haven't the foggiest!
shall we take a peek
around?

Well, I suppose that's not such a bad view,
might even make Pebunia a little envious
tucked up at home as she is. You know
Roger she simply would not stop going on
about that trip to Sengatus-Oxi!

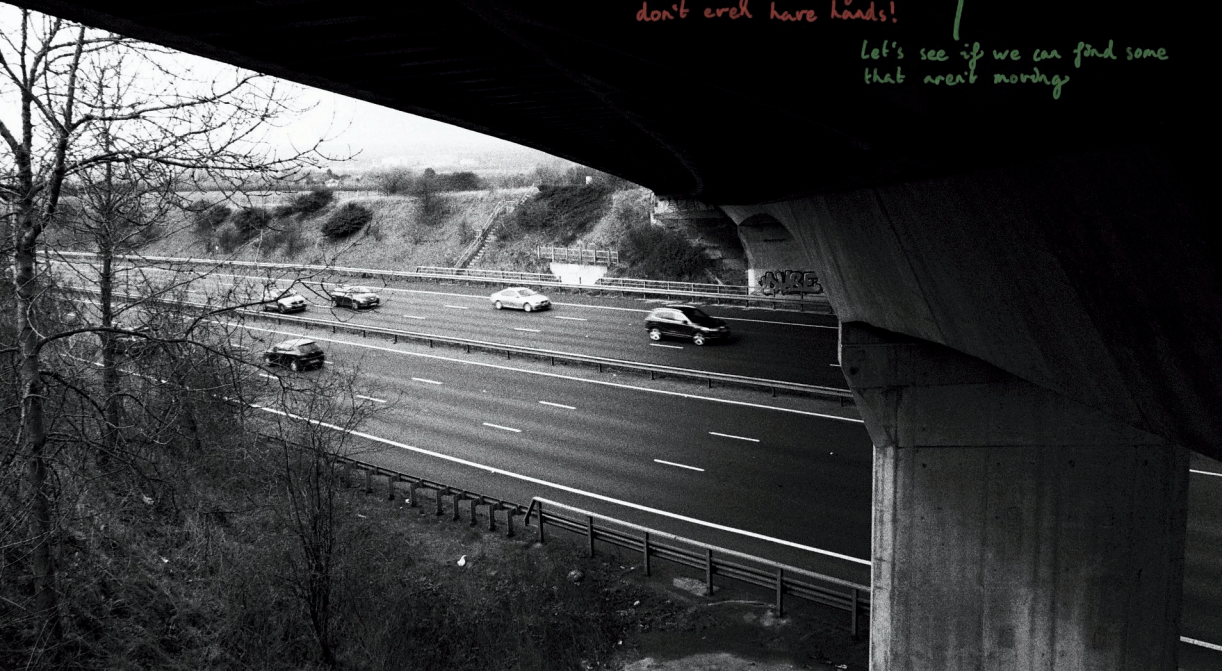

Perhaps not quite so lovely that side
It's a good thing you worried over those brollies!

And careful dear, more of those strange
lifeforms. It looks like they've been
constructing their own paths!

How very odd, they
don't even have hands!

Let's see if we can find some
that aren't moving.

Well, not here..

VRUSHH!!

A black and white photograph of a highway underpass. A bright light flare emanates from the center of the road, creating a strong contrast with the dark surroundings. The concrete structure of the overpass is visible on the left. Bare trees and a dark landscape are in the background. The text 'VRODARR!' is written in a stylized, purple font in the lower-left foreground.

VRODARR!

Perhaps over that bridge, Phyllis?

Ok this looks a bit more hopeful!

shall we take a quick look inside?

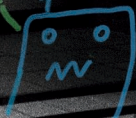

Well I don't see why not

STARBUCKS

Well Phyllis, I must admit,
these strange symbols don't
match my ~~Abend~~ pocket
dictionary at all.

No, I don't understand
a single thing

Oh Phyllis,
I'm worried

That's ok Roger,
we'll make it
through. We always
do.

I do hope you're right
we'll just have to try and
make the most of it

That's the spirit, dear!

Today's News

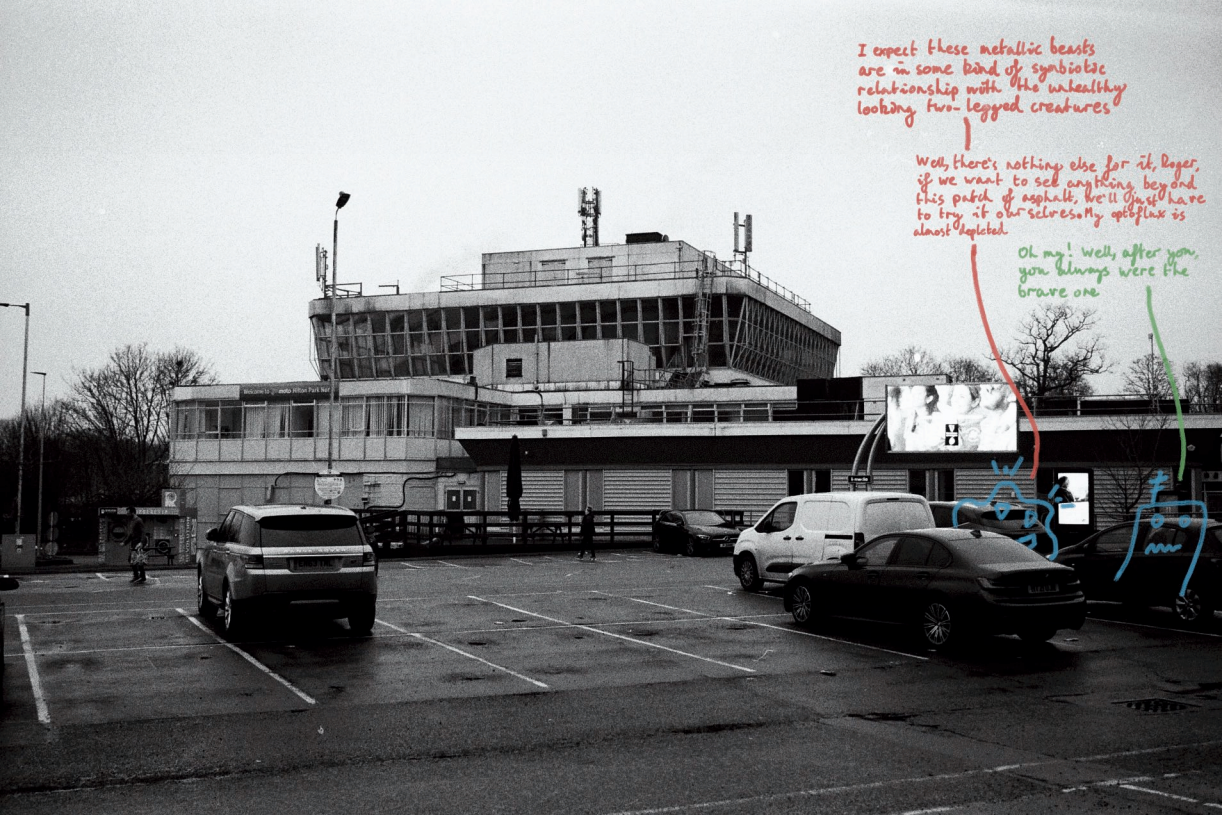

What a \$1 deal says about America's office market

The US is facing an office property "apocalypse", which is creating worries around the world.

I expect these metallic beasts
are in some kind of symbiotic
relationship with the unhealthy
looking two-legged creatures

Well, there's nothing else for it, Roger,
if we want to see anything beyond
this patch of asphalt, we'll just have
to try it ourselves. My optiflux is
almost depleted.

Oh my! Well, after you,
you always were the
brave one

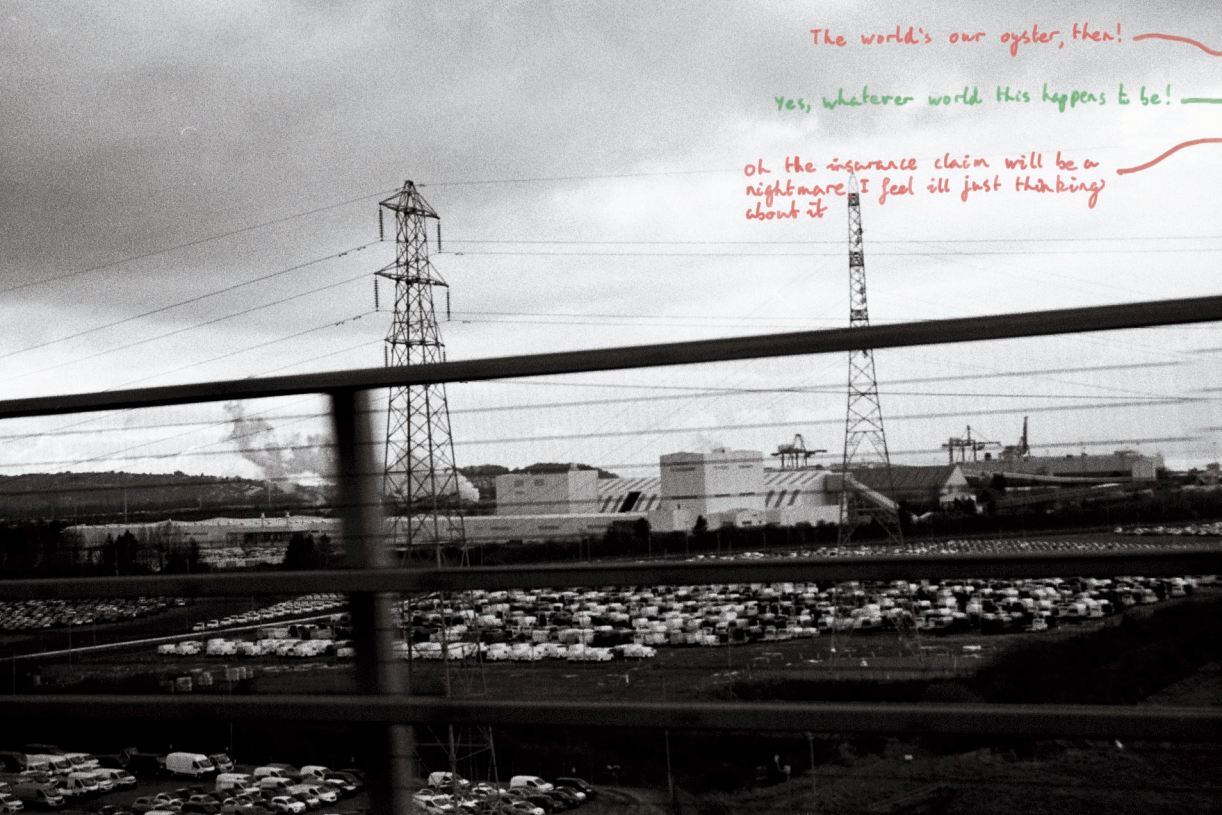

well that was unexpectedly simple...

Yes, this is much easier than the old optoflow

The world's our oyster, then!

yes, whatever world this happens to be!

oh the insurance claim will be a
nightmare I feel ill just thinking
about it

000HH...

ААННН...

WOWWW...

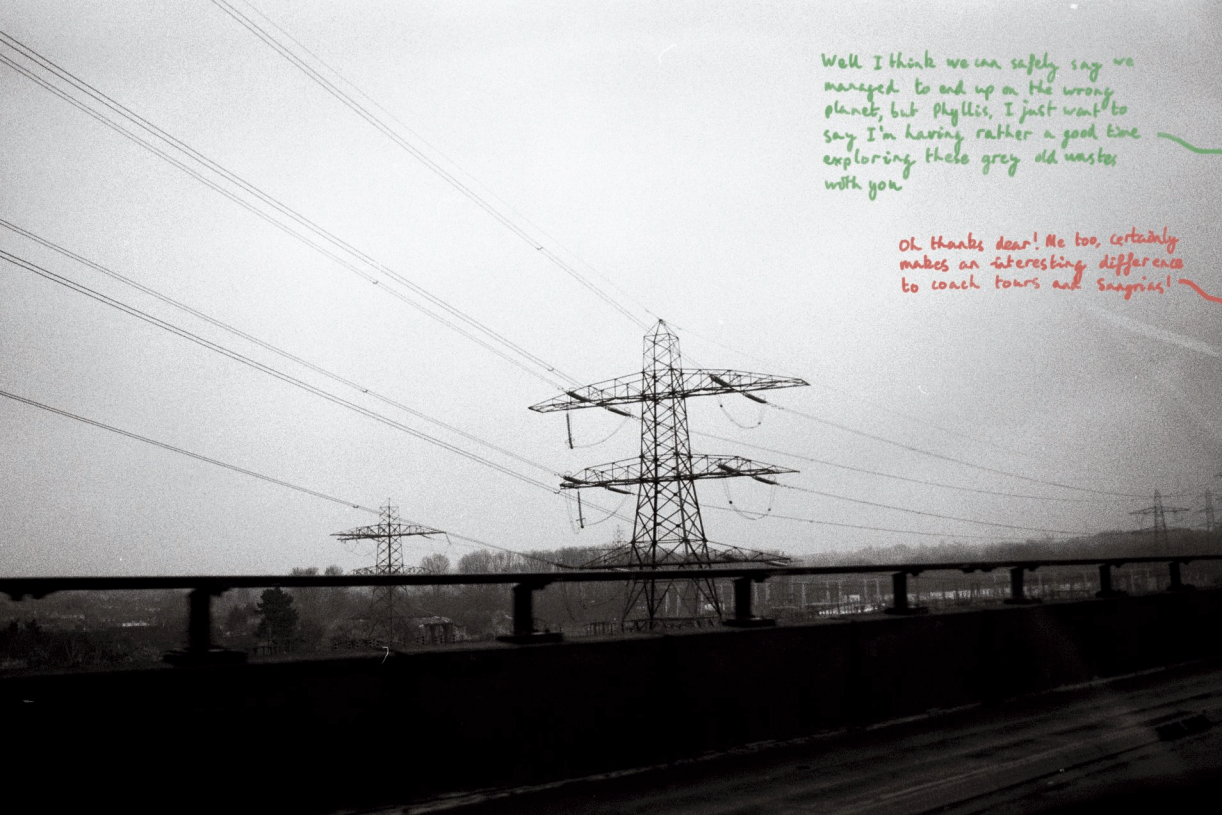

HHMMM...

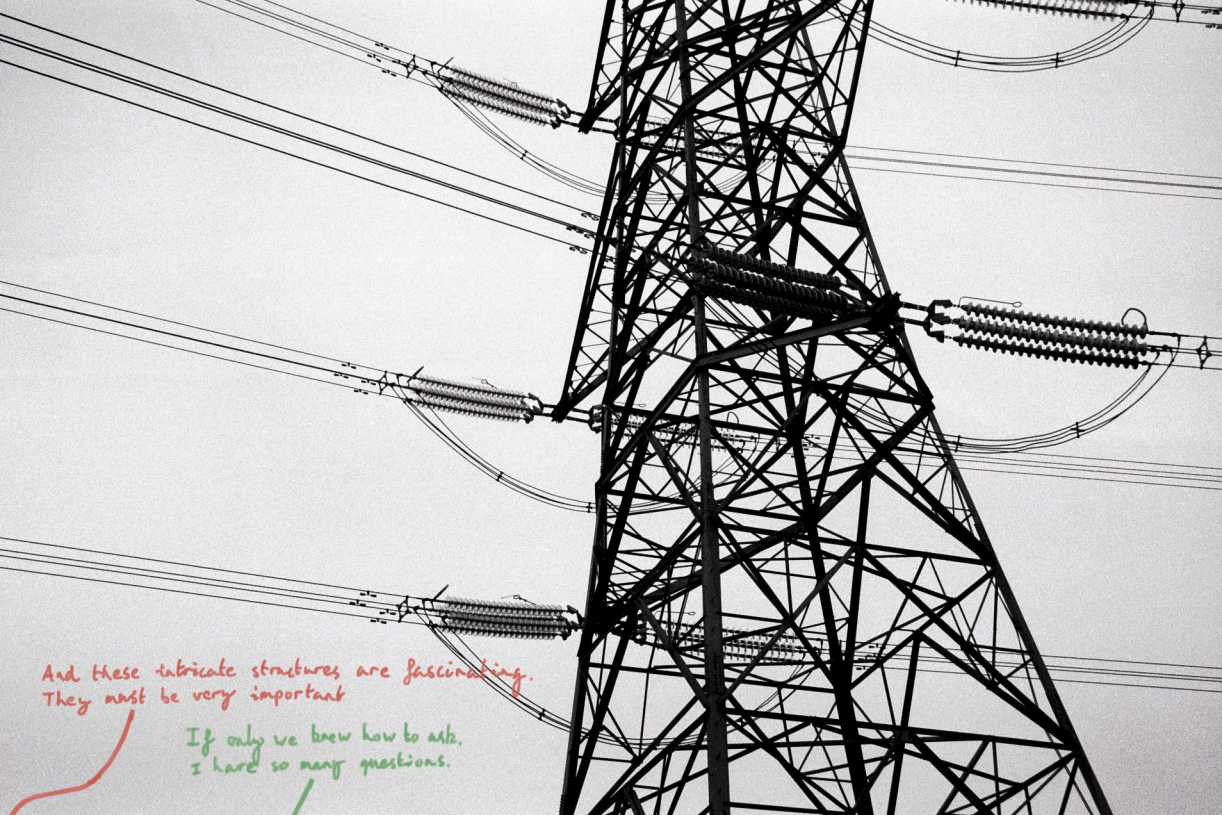

Maybe we should see where they're all
off to? It could be some kind of ritual

Oh yes, maybe even a
place of worship

Well I think we can safely say we
managed to end up on the wrong
planet, but Phyllis, I just want to
say I'm having rather a good time
exploring these grey old wastes
with you

Oh thanks dear! Me too, certainly
makes an interesting difference
to coach tours and Saigona!

And these intricate structures are fascinating.
They must be very important

If only we knew how to ask,
I have so many questions.

It looks like things are slowing down,
Perhaps we're getting closer!

Do you think this could be it?

Well it is rather
built up

I think we should get out to take a peak

Oh ay!

Hey I'm over here!

Could yern get my photo?

ol ny...

I wonder why no one else is here?

Well, maybe it's not a holy day today

STAY

STAY

Well maybe we've seen enough

Yes, let's see if we can't
be back on our way

SHHHH

Well, I suppose we just find somewhere to
leave the poor thing, & then set off home
to Galapagne

Yes I think so, I feel I've formed
a reasonable impression of the place

WELCOME TO COVENTRY

Well I think here would be as
good as anywhere!

I've even grown fond of
the old thing

Yes let's hope it doesn't end up like
that one over there...

I wonder what that being
with wings is..

FATHER FORGIVE

Christ only knows! We just have to find a tall position
to start the Galaptnactic transporter from

up there should do!

Oh yes, this ought to do!

Me too :)

Good idea!

Well, it has been an unusual one, but I've had quite the adventure

Let's get a few of those arepas on the way back

FIN.
